

Monitoring System

Product School

Prevent fire hazards & explosions

Share template feedback

What went well?

What should we keep doing? What should we celebrate? Where did we make progress?

Attain

No Rain No Flowers

Get real-time alerts the about gasous presence in the atmosphere

The lot technology

senses and that

works to shut the

gas leakage

Cost effective installation

It measures toxic gases in very low concentration

What went poorly?

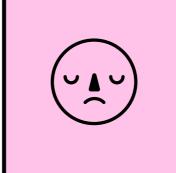

Where did we have problems? What was frustrating to us or others? What held us back?

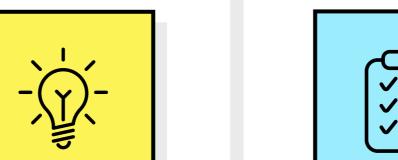

No Winter Lost Forever No Spring Skips its Turn

Misery

It is difficult to know failure modes unless very advanced

We can't detect the accurate place, where gas started to leak.

Gas Leakage

Monitoring

System

() |---

Piscussion should be made with team members

We have to progress in the mission that we are taking

Things should go out well

How should we take action?

What do you believe we should do next? What specific things should we change? What should extend beyond this meeting?

This gas leakage prevention creates a massive response among the society

and gives an eye

opening solution

What ideas do you have?

We can easily

overcome the gas

leakage problem in a

easy way without

human power

What ideas do you have for future work together? Where do you see opportunities to improve? What has untapped potential?
